MUHAMMAD RAFLI HAFID

Artificial Intelligence Undergraduate, BINUS University (Kemanggisan)
West Jakarta, Indonesia | +62 823 8451 8081 | rafliali337@gmail.com
LinkedIn | GitHub | Portfolio: alirafli-portfolio.pages.dev
Internship availability: Full-time, 1 February 2027 – 31 January 2028

PROFILE

Artificial Intelligence undergraduate with a 3.68/4.00 GPA, interested in self-hosted AI systems, including large language models, image generation, and text-to-speech. Enjoy exploring practical applications and personal assistants, with additional interests in audio machine learning and data science. Seeking to develop technical skills through hands-on work, mentorship, and collaboration, while remaining open to new technologies and responsibilities.

EDUCATION

BINUS University – School of Computer Science August 2024 – July 2028 (Expected)
Artificial Intelligence Program *Cumulative GPA: 3.68/4.00*

SELECTED PROJECTS

Project Mordred – Self-Hosted Conversational AI Assistant August 2026 – Present
Individual project

- Designed an LLM-based workflow to detect reminder intent in Telegram messages and extract structured title, date, and time fields for PostgreSQL storage.
- Run the backend on an Ubuntu homelab, using LM Studio for local model serving and Postman for API request testing.
- Manually tested reminder creation and deletion through Telegram; the reminder feature remains in development.

Glucode – Nutrition Label Scanner & Summarizer February 2026 – June 2026
Four-person academic project | GitHub

- Originated the concept and specified an OCR-to-summary workflow for packaged-food nutrition labels, proposing Gemini API use for OCR and language-model processing.
- Created the Figma prototype for scanning, nutrition summaries, reusable food cards, and daily intake logging; the prototype guided the completed application.

Credit Risk Predictor – Credit Default Classification
Individual MLOps coursework | GitHub

- Designed the workflow and ran notebooks on 32,581 records with imputation, numerical scaling, and one-hot encoding; compared Logistic Regression, Random Forest, and XGBoost results.
- Published the prediction application and built and ran its Docker container, packaging the application and saved model artifacts.

TECHNICAL SKILLS

Programming: Python, C
ML and data coursework: scikit-learn, PyTorch, TensorFlow, pandas, NumPy
Project tools: Docker, Linux (Ubuntu Server CLI), Ollama, LM Studio, Figma

ACTIVITIES & ACHIEVEMENTS

GEMASTIK 2026 – Data Mining, BINUS Representative
Passed internal selection with a three-person team; developed the idea and wrote a competition paper on weather-based paddy drying prediction using physics simulation and ML.

BRAIN – Creative Media Department Staff
Created social-media designs and edited videos for organization activities, including the 2026 Organization EXPO.

BINUS AI Major Social Media Team
Created educational Instagram posts and appeared in a video; currently involved in the video-content team.

Programming Outreach – SMPN 111 Jakarta May 2025
Selected introductory C-programming material, prepared slides, and personally delivered the session.

LANGUAGES

Indonesian: Native
English: IELTS simulation overall 6.5 – TIME Language Centre, Padang (August 2026)
